Professional Summary

Currently pursuing a Bachelor of Science in Computer Science and Engineering (CSE) at the University of Asia Pacific with a CGPA of 3.86/4.00. Passionate about Machine Learning, Deep Learning, Explainable AI (XAI), Web Development, and Software Engineering. Experienced in academic research and the development of AI, software, and robotics projects through coursework and collaborative initiatives. Seeking an internship to apply technical knowledge, enhance practical skills, and fulfill the Industrial Training (CSE 404) requirement while contributing to innovative and impactful projects.

Technical Skills

Programming Languages	C, C++, Python, Java
AI & Data Science	Machine Learning, Deep Learning, Explainable AI (XAI), Data Visualization (Matplotlib, Seaborn)
Software Engineering	Software Testing, Object-Oriented Programming (OOP), Web Development
Database	Database Management Systems (DBMS), SQL, MySQL
Tools & Technologies	GitHub, Arduino IDE, AutoCAD, Tinkercad, OptiSystem

Projects

Explainable Early Sepsis Prediction Using Temporal Deep Learning and XAI [Click](#)

- Objective: Develop an explainable deep learning model for early sepsis prediction using ICU time-series data.
- Role: Data preprocessing, model development.

QuantaDOT [Click](#)

- Objective: Develop a low-cost Bluetooth-controlled educational robot to promote hands-on STEM learning through interactive robotics.
- Role: Hardware integration, Arduino programming, embedded systems development, sensor integration, and system testing.

Loan Management Prediction [Click](#)

- Objective: Develop a machine learning model for loan approval prediction.
- Role: Data preprocessing, model development, performance evaluation, and result analysis.

HopeHub [Click](#)

- Objective: Design and develop a software solution following software engineering principles.
- Role: Requirement analysis, software design, implementation, and software testing.

ESP32-CAM Based Surveillance Car [Click](#)

- Objective: Develop a Wi-Fi-enabled surveillance robot for real-time remote monitoring.
- Role: Embedded programming, ESP32-CAM integration, hardware development, and testing.

Phoenix Mart [Click](#)

- Objective: Design and develop a database-driven e-commerce management system.
- Role: Database design, SQL development, backend implementation, and testing.

Rokto Lagbe [Click](#)

- Objective: Develop a blood donor management system for efficient donor registration and search.
- Role: Frontend and backend development, database integration, and application testing.

Areas of Interest

- | | | |
|--------------------|---------------------------|------------------------|
| • Web Development | • Deep Learning | • Explainable AI (XAI) |
| • Machine Learning | • Artificial Intelligence | • Software Engineering |

Currently Learning

- Linux System Administration
- Natural Language Processing (NLP)
- Blockchain Technology
- VLSI Design

Education

Bachelor of Science in Computer Science & Engineering (CSE) CGPA: 3.86/4.00 (Up to 7th Semester)

University of Asia Pacific (UAP)

Expected Graduation: December 2026

Registration ID: 22201034

Higher Secondary Certificate (HSC)

GPA: 5.00/5.00

BPATC School & College

Secondary School Certificate (SSC)

GPA: 5.00/5.00

Dhamrai Hardinge High School & College

Academic Honors

- Awarded the **Vice Chancellor's Honor Award** in two semesters and the **Dean's Honor Award** in four semesters in recognition of academic excellence at the University of Asia Pacific (UAP).
- **Board Scholarship** in Secondary School Certificate (SSC) examination from Dhaka Board, Bangladesh.

Research Experience

Undergraduate Thesis

Early Sepsis Prediction Using ICU Time-Series Data with Explainable and Resource-Adaptive AI

Supervisor: Molla Rashied Hussein

Assistant Professor

Department of Computer Science and Engineering

University of Asia Pacific

Role: Literature review, Data preprocessing, Temporal deep learning model development, Explainable AI (XAI) implementation, and Performance evaluation.

Ongoing Research

- **Fine-Tuned Multilingual Question Answering Model with Retrieval-Augmented Generation (RAG) and Evidence-Based Explainability**
Role: Dataset preparation, multilingual QA model fine-tuning, RAG pipeline development, evidence retrieval, and explainability analysis.

Achievements

- Champion in “**Robo Expo 2.0**” organized by Robotics Club, UAP-CSE.
- Champion in “**View Finder Season 7**” organized by Film and Photography Club, UAP-CSE.
- 1st Runner-up in “**View Finder Season 6**” organized by Film and Photography Club, UAP-CSE.
- Completed “**Excel Essentials for Workplace Productivity**” certification offered by UNICEF Passport to Earning.
